Description	Ideal for placing in, under and around machines to catch drips. It is highly sorbent and non-granular so it will not damage plant equipment. Each case sorbs 37.5 gallons and contains 100 pads (each 15.5 inches by 20.5 inches).	Used to clean up small spills and wipe down oily tools and equipment. Designed to be placed on machinery to catch leaks at the source. Each case sorbs 31.5 gallons and contains 100 pads (each 7.5 inches by 20.5 inches).	Designed to cover large surfaces and may be easily cut to fit tight corners. Can also be used to cover large spills or as a precaution in areas where large spills may occur. Each roll is 15.5 inches by 150 feet and sorbs 31 gallons.	Designed to cover large surfaces and may be easily cut to fit tight corners. Can also be used to cover large spills or as a precaution in areas where large spills may occur. Each roll is 38 inches by 150 feet and sorbs 76 gallons.

Description	 <p>Will sorb most non-aggressive liquids and is used in maintenance applications. Each case contains 6 booms which will absorb 2 gallons each. A case weighs 12 pounds.</p>	 <p>The sorbent drum cover is designed to be used on a 55 gallon drum to catch drips and spills that occur during the dispensing of all types of non-aggressive liquids used in daily operations. Contains 25 covers per case and sorbs 12 gallons/case.</p>	 <p>This high capacity sorbent has a scrim on one side to increase strength and help eliminate linting. It is dispensed from a carrying/dispenser box in the form of a continuous roll with perforations every 16 inches.</p>	 <p>Four sorbents in one. It can be used as a boom, pillow, pad, or roll, which means fewer products need to be stocked to meet your sorbent needs. The folded sorbent is perforated every 16 inches to allow you to select the length required, so there's less waste.</p>

Description				
	This boom is a 8 inches by 10 feet scrim encased tube of particulate sorbent material secured by a UV resistant netting. Built-in attachment clips are provided at each end of the boom allowing the booms to be linked together, overlapping and preventing seepage between segments.	Mini-booms are typically used to encircle spills and to contain leaks. A 3 inch diameter scrim on the outside of the boom identifies the application. This boom is 4 feet in length.	Designed to cover large surfaces, can be easily placed in tight areas. Ideal for cleaning-up small spills and wiping down contaminated areas. The HP-100 roll sorbs 73 gallons per roll and is 38 inches by 144 feet long.	This high capacity, low profile Sorbent pad, picks up petroleum based fluids, will not absorb water. For routine use, cleaning up small spills and wiping contaminated areas. 100 pads (19 inch X 17 inch) per bale, (37.5 gallons/bale).

Description				
	Used in areas where foot and vehicle traffic is a concern. Designed to sorb liquids while enduring the punishment of being tread upon, sorbent rugs are both durable and versatile. Each rug comes in a roll 36 inches by 300 feet and sorbs 32 gallons per roll.	This rug is designed for use in industrial maintenance applications where foot and vehicle traffic is a concern, and will sorb most non-aggressive liquids. Each rug comes in a roll 36 inches by 100 feet and sorbs 10.5 gallons per roll.	Can be easily cut to cover small areas or fit tight corners. May be used to cover bench tops in anticipation of a spill while also acting as a work surface. Able to sorb 31 Gallons/roll. Each roll is 15.25 inches by 150 feet.	Can be stored indoors or outdoors. Easily identified by its bright white color. Packed in an element resistant 20-gallon drum. Combines both folded sorbent materials and high capacity pads which allow for selection of product for each response situation.

Description	 Includes the 3M™ Air Regulator SA-1009 and Waist Belt GVP-127. Used with breathing tube, facepiece, filters/cartridges and air supply hose, it makes a complete 3M™ Dual Airline Supplied Air Respirator.	 Includes the 3M™ Dual Airline Connector SA-1029 and the Waist Belt GVP-127. This assembly can be used with any 3M™ Low Pressure Dual Airline Supplied Air Respirator.	 This NIOSH-approved organic vapor/high efficiency cartridge helps provide respiratory protection in environments containing certain organic vapors and particulates. Used with 3M™ GVP Belt-Mounted Powered Air Purifying Respirator Systems.	 This battery pack supplies the power to operate the motor blower. The nickel cadmium battery has over-charge protection and provides eight hours of use per charge. It has a life of approximately 1000 charge/discharge cycles.

	29209	37008	37018	37019
Description	 This battery charger will keep the battery properly charged and ready for use.	 This bumpcap with wide-view faceshield can be used with certain 3M™ Powered Air Purifying Respirators or Supplied Air Respirator systems to help provide respiratory protection for a variety of applications. Allows the user to wear most prescription glasses.	 This supplied air respirator assembly, when used with approved breathing tube and headgear, can help regulate the flow and temperature of supplied air system. Cools the air up to 50°F (28°C). Includes the cooling tube, waist belt and holder.	 Allows the worker to set the airflow to the most comfortable level. Includes the valve and waist belt. It is strictly a regulator and will not warm or cool supplied air to the worker.

Description	 The M-957 / L-115 Comfort Pad can be used on any 3M™ VersaFlo™ M-Series Headgear, 3M™ L-Series Headgear, H-Series Hood, and Whitecap™ Helmets. It attaches to the headband in the area of the users forehead.	 Used on 3M™ Bumpcap L-501/37008(AAD). This faceseal material is designed for applications such as spray painting. It attaches to the extender on the wide view faceshield.	 Used with the 3M™ Headgear L-Series. It is attached to the opening on the headgear. The lower end of the breathing tube is attached to the air control device.	 Used on the 3M™ Headgear L-Series. This lens is part of the 3M™ Wide-view Faceshield Assembly L-130. It can easily be removed and replaced with a new lens when damaged.

3M™ Automotive Fresh Air System Parts (continued)

	66124	66254	66375	GVP-101
Description	 Used with the 3M™ L-Series Headgear. It is a general purpose faceshield which should not, by itself, be used for welding applications. It attaches to the headgear using a positioning cam mechanism.	 Attaches to the 3M™ Wide-view Faceshield Assembly L-130. The 3M™ Faceseal L-121 attaches to the extender for spray painting or where there is general particulate exposure.	 Used on 3M™ Headgear L-Series. The head pad is part of the 3M™ Head Suspension and is attached to the hanger suspension. The pad adds to user comfort.	 Provides the seal that allows the motor blower to provide proper air flow to the user. It includes five inlet and five outlet.

Description				
	This gasket, 4 1/2 inches x 5 1/4 inches is part of the welding lens stack. It is placed between the cover plate and the glass shade lens to prevent glass breakage due to heat buildup. The gasket is not used with the electronic lens.	This shield, 4-1/2 inches x 5-1/4 inches, is designed for use with the 3M™ Bumpcap L-503 and Hardhat L-703. It attaches to the headgear with a positioning cam that is secured by a spring-loaded knob on each side of the headgear.	This cover plate, 4-1/2 inches x 5-1/4 inches, is part of the lens stack. It is placed between the lens gasket and the film gasket on the welding lens stack. On the electronic lens stack, it is placed between the lens gasket and the lens.	This welding shield, 4 1/2 inches x 5 1/4 inches, is designed for use with the 3M™ Bumpcap L-505, Hardhat L-705 and Helmet L-905. It attaches to the headgear with a positioning cam that is secured by a spring-loaded knob on each side of the headgear.

Description				
	This safety plate, 4-1/2 inches x 5-1/4 inches, is used in the welding lens stacks that use shade glass. It is placed on the outside nearest the wire clip that securely holds all parts of the stack in place. The plate is ANSI approved.	Used on the 3M™ L-Series Headgear L-700 and L-900. It is installed into the headgear shell before the head suspension is installed. With this foam liner, the headgear is ANSI Class I, II approved for top and side impact.	Used on the 3M™ L-Series Bumpcap L-500. It is used to help prevent leaks around the headgear. The seals are installed into the bottom edge of the headgear and should not be removed unless they need to be replaced.	This air deflector is an option for use on any 3M™ Headgear L-Series. In the standard configuration, the airflow is toward the inside of the faceshield lens. With the air deflector, the airflow is redirected towards the face of the user.

3M™ Automotive Welding Respirator Replacement Filters

	07000	07184	29113	37173
Description				
	This NIOSH-approved P100 particulate filter helps provide respiratory protection in environments containing certain oil and non-oil based particles when combined with 3M™ Half and Full Facepiece Respirators according to NIOSH approvals.	P100 particulate filter helps provide respiratory protection in environments containing certain oil and non-oil based particles. 3M recommended for nuisance level organic vapor relief. Use with 3M™ Half and Full Facepieces according to NIOSH approvals.	Replacement part for 3M™ Full Facepieces 7800S. Use to attach 3M™ Filters 2000 Series, 3M™ Filter 7093, 3M™ Cartridges 6000 Series or 3M™ Dual Airline Systems.	This cartridge/ filter is NIOSH approved and provides the highest level of protection against oil and non-oil based particles. Use with 3M™ Half and Full Facepiece Respirators 6000 Series, Half Facepiece Respirator 7500 Series and Full Facepiece Respirator 7800 Series with bayonet filter holders.

Description	 The Speedglas 100 scratch resistant outside protection plate is hard-coated and available for use in demanding environments to help resist scratching, abrasion and spark and spatter.	 The Speedglas 100 high temperature outside protection plate is formulated from an engineered resin to resist higher heat applications. This is recommended for use in high amperage welding or conditions where long weld beads may generate radiant heat.	 The 1.5X Magnifier is used for magnifying object 1.5X's the normal power. Can be inserted into the Speedglas 9100 ADF on the inside slot.	 The 2.0X Magnifier is used for magnifying object 2.0X's the normal power. Can be inserted into the Speedglas 9100 ADF on the inside slot.
