| FM10 | 10 | $\frac{29}{32}$ | $\frac{7}{32}$ | 9 + 13 |

FM10

### Features
• Designed for shear cuts on steel, plastics, laminates and hard woods. Also good for finishing in most materials.
• Has curved teeth for fast removal of soft metals, lead, aluminum, soft woods and fillers.
• The edges are parallel and uncut, and the surface has milled teeth - one side shear cut and one side curved teeth.
• File coated with a protective layer of paint.
