

K Body® REVO™ JR

BESSEY® Parallel Bar Clamp, 900 lbs. (nominal) of clamping force

Simply better.

The BESSEY® K Body® REVO™ JR is a new, mid-sized version of what made the full-sized REVO parallel clamp so great.

Powerful jaws:

With up to 900 lbs of clamping force, the REVO™ JR can handle almost any precision clamping task.

Parallel jaws:

90 degree jaws make cabinet work, frame ups, drawers and any other right-angle glue-up a much easier task.

Lightweight:

Despite its 900 lb rating; this clamp is easily 30-40% lighter than all other parallel clamps claiming a rating of 900-1100 lbs. Lighter weight means less exertion, less user fatigue and greater productivity.

Quality construction:

German engineering, German steel, assembled in USA facilities.

Value:

High-end quality with a mid-size price. K Body® REVO™ JR by BESSEY®
