

Redesigned!

Heavy Duty Bolt Cutters and Replacement Heads

Work just got easier! Years of experience and dedication working with Professionals, has resulted in the best RIDGID Bolt Cutters ever!

RIDGID Bolt Cutters are designed for cutting rod, wire mesh, concrete form ties and rebar, cables, bolts, etc. Our slim heads permit cutting close to surfaces. The jaws are made of hardened alloy steel, and are heat-treated for increased wear resistance and maximum strength and durability.

Benefits:

- Hardened alloy steel jaws have been designed and manufactured to assure the longest possible blade life no matter what the job.
- One-step internal cam mechanism provides the quickest and simplest way to keep the blades precisely aligned.
- Handles and grips designed to allow greater mechanical advantage for crisp, controlled cutting.
- *Unmatched RIDGID warranty*
