SOCKET SETS

Stanley offers a complete range of inch and metric sized sockets and 1/4", 3/8", 1/2" and 3/4" drive tools. Our socket sets combine the most popular tools for easy accessibility.

Stanley® Professional Grade™ Mechanics Tools are designed to meet the needs of the professional mechanic. Each of these tools has a Limited Lifetime Warranty.

Stanley® drive tools are forged from high-quality steel and finished in high-polish chrome. Each ratchet handle is ergonomically designed and has an easy-to-use, thumb-operated reverse-switch mechanism. Sockets and extensions remain locked onto the drive until disengaged with an easy-to-reach, low-profile quick-release button.

Stanley® sockets feature our **Max-Drive™** design, a unique radius corner design which provides 15% more torque to tighten fasteners easily and simplify the turning of rounded corners. Helps reduce fastener wear by minimizing contact on outer 5% of fastener; helping increase life expectancy. Helps reduce slipping on frozen or rusted fasteners.

All Stanley® ratchets and sockets are manufactured globally, and are designed to meet or exceed ANSI specifications.

RATCHETS

Stanley® ratchets and accessories are designed to meet or exceed ANSI specifications. All are forged from high-quality steel and finished in high-polish chrome. Each ratchet handle is ergonomically designed and has an easy-to-use, thumb-operated reverse-switch mechanism. Sockets and extensions remain locked onto the drive until disengaged with an easy-to-reach, low-profile quick-release button.

Stanley® high-torque ratchets have a **Quick Release™** mechanism for one-handed use with a limited lifetime warranty.

Stanley® Professional Grade Pear Head Ratchets have a slim profile and a small **7-degree arc-swing** for accessibility to hard to reach fasteners. **A single pawl** with eight teeth engages the gear to deliver strength. Durability is increased by dispersing the torque over a larger surface.

SOCKETS

Stanley[®] sockets feature our **Max-Drive™** design, a unique radius corner design which provides 15% more torque, making it easy to tighten fasteners and simplifies the turning of rounded corners. Helps reduce fastener wear without contact on outer 5% of fastener, so fasteners last longer. Helps reduce slipping on frozen or rusted fasteners.

All sockets are designed to meet or exceed ANSI specifications. Stanley[®] sockets are manufactured worldwide with high-alloy steel and heat treated for performance.

WRENCHES

Stanley[®] wrenches are designed to meet or exceed ANSI specifications. The box end of the Stanley[®] Combination wrench employs the **Max-Drive™** system, which allows the box end to contact the fastener away from the corner. This system allows **15% more torque** to be applied to the fastener and helps reduce fastener rounding.
