

Type 240

Jobber Length - Black Surface Treated 118° Point - General Purpose

Performs well in a variety of ferrous metal drilling applications. The black surface treatment prevents chip welding and increases abrasion resistance.

Black Surface Treated

DRILL SETS - JOBBER LENGTH PARABOLIC

Type 240-PT and 240-P Sets - Tin Coated & Parabolic Surface Treated

Type 240-PT - Jobber Length - Heavy-Duty Parabolic - TiN Coated - 135° Split Point

This exceptional high-performance drill with the super hard TiN coating may extend tool life 500% or more in very abrasive drilling applications. The parabolic flutes eliminate the need for frequent drill removal in deep hold drilling.

Type 240-P - Heavy-Duty - Parabolic Flute 135° Split Point - Surface Treated

Parabolic flute drills are designed to allow deep hole drilling without frequent drill removal to clear chips. These drills perform best in low to medium tensile strength materials. The split point and heavy-duty design provide superior performance by permitting higher feed rates and continuous drilling of deep holes.

Parabolic - Tin Coated
